DBA 802 submission instructions

Package folder: DBA802_Hemasri_Babburu_Final_Assignment
Zip file: DBA802_Divya_Final_Assignment.zip

Upload the zip if the course dashboard accepts one file. If it asks for separate uploads, use the mapping below. Do not upload a substitute for the missing journal confirmation.

Individual uploads

Professor item	Upload this
1. Complete research paper	01_Complete_Research_Paper/Hemasri_Babburu_DBA802_Final_Research_Paper.pdf and the Word file with the same name.
2. Tables, images, and graphs	The whole folder 02_Tables_Images_Graphs/, or Figure_1.png, Table_1.xlsx, Table_2.xlsx, and Figure_and_Table_Index.pdf.
3. Supporting data	The whole folder 03_Supporting_Data/. Start with README.md.
4. Graphical abstract	04_Graphical_Abstract/Graphical_Abstract.png and Graphical_Abstract.pdf.
5. Supplementary materials	The whole folder 05_Supplementary_Materials/. Start with Supplementary_Materials_Index.pdf.
6. Journal submission proof	Do not upload a proof yet. Read 06_Journal_Submission_Proof/Journal_Submission_Proof_PENDING.txt, complete the Elsevier submission, and then add the real confirmation screenshot to that folder.

Journal confirmation, when it exists

The screenshot has to show Knowledge-Based Systems, the manuscript title or the submission ID, and a submitted status. A picture of the start page, the file-upload step before submit, or a draft is not this requirement. Rebuild the zip after the screenshot is in folder 06.

What not to change

Do not replace the paper with a new write-up. Do not add a second results figure. Do not type a student ID, an affiliation, or an e-mail that was not supplied. Those journal-form fields are entered on Elsevier by the author, on the title page, at the time of submission.

The checklist at the root of the package is DBA802_Assignment_Compliance_Checklist.xlsx. The narrative audit is DBA802_Final_Verification_Report.pdf.
